

Fractions- Sum & Difference (Addition & Subtraction)

MrB4math.com

To add or subtract fractions, you must have common denominators. Why?

$$\frac{2.2}{5.2} + \frac{3}{10} =$$
$$\frac{4}{10} + \frac{3}{10} = \frac{7}{10}$$

Fractions- Sum & Difference (Addition & Subtraction)

To add or subtract fractions, you must have common denominators. Why?

$$\begin{array}{r} \frac{2 \cdot 4}{3 \cdot 4} - \frac{1 \cdot 3}{4 \cdot 3} = \\ \frac{8}{12} - \frac{3}{12} = \frac{5}{12} \end{array}$$
